

ABSTRACT OF THE DISCLOSURE

One or more embodiments of the invention provide a computer-implemented method for stylizing data into a presentation. A domain/data object is obtained that comprises an object representation of data stored in a database for a domain entity. An application object is then obtained that comprises an object representation of the data in the domain object that is relevant for a particular computer application. Lastly, a presentation object is obtained that comprises an object representation that encapsulates a visual appearance of the data in the application object.
